Solar Power Generation Equipment Begins Operations at P.T. Yakult Indonesia Persada

Yakult Honsha Co., Ltd. (President: Hiroshi Narita) is proactively implementing measures such as utilization of renewable energy to realize Environmental Vision 2050, under which it aims to achieve net zero-carbon emissions throughout Yakult Group's value chain.

The group has completed the installation work of the solar power generation equipment, which it had been working on at the Sukabumi and Surabaya Plants of P.T. Yakult Indonesia Persada. The equipment, which will generate 1,091 kW of electricity for consumption at the plants, started operating on January 31, 2025.

The introduction of the solar power generation facilities is expected to reduce CO₂ emissions by about 1,054 t a year.

The Yakult Group will further introduce renewable energy and energy saving initiatives, and continue to proactively contribute to the conservation of the global environment based on its corporate slogan of "In order for people to be healthy, everything around them must also be healthy."
